

Electronic Monitoring

Service Population

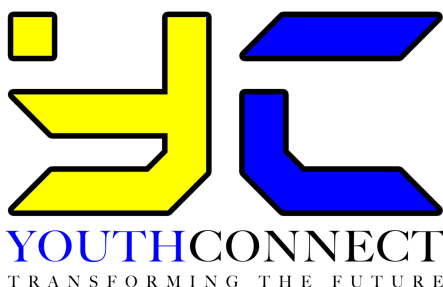

Appropriate for both youth and adults to provide 24/7 geolocation monitoring involved in the court system or to help maintain whereabouts of youth.

Focus Points

The SCRAM GPS System has the following benefits for monitoring clients:

- Customizable inclusion/exclusion zones allow for tailoring supervision to the risk of the client and the needs of the community
- Track and communicate with clients 24/7
- Revolutionary strap design and reliable tamper technology substantially reduce false alerts.
- Extreme temperature, shock, and impact resistance
- Used for geolocation tracking only or added with a surveillance worker to monitor compliance

For additional information about this program or to make a referral, please contact our team and we would be happy to assist you.

Program Description

Youth Connect consists of individuals that have decades of experience working in law enforcement, electronic monitoring, school environments, therapeutic treatment centers, corrections, and a number of other mental health-related fields. Its employees are individuals that are self-driven, highly ethical, client focused, and capable of working in high stress environments for extended periods of time.

Youth Connect of Virginia uses the latest technology for electronic monitoring equipment. SCRAM systems prides itself on using advanced technology to help make communities safer.

The SCRAM GPS is a one-piece Global Positioning System (GPS) that combines superior location monitoring accuracy and 2-way communication with an industry-leading strap design that virtually eliminates false alters. SCRAM Systems offers GPS solutions on all cellular networks to provide comprehensive location monitoring options. SCRAM GPS uses a strap design that is different from other GPS products, essentially eliminating intermittent strap disruptions that are responsible for the system-imposed grace periods required to manage false alerts in other GPS technologies.

Youth Connect can provide GPS monitoring to both youth and adults. Case Managers can also gain access to daily event summaries or the ability to see location data in the SCRAM system.
